Subject: Request for Parflex Division product Material Safety Data Sheets (MSDS)

To Whom It May Concern:

Thank you for purchasing Parflex Division products. This letter is submitted in response to inquiries for Material Safety Data Sheets for products manufactured and supplied by the Parflex Division, a Division of the Parker Hannifin Corporation.

We manufacture finished products, or "articles", that by definition are excluded from the United States Occupational Health and Safety Administration's (OSHA) Hazard Communication standard; Title 29 CFR Part 1910.1200. "Articles" are defined essentially as manufactured items which are formed into a specific shape or design for a particular end use function and which will not release or otherwise result in exposure to a hazardous chemical under normal circumstances of use.

The Parflex Division does not manufacture or produce chemical substances. The chemical substances purchased from outside vendors and resold through the Parflex Division (except for items defined as "articles") have a Material Safety Data Sheets (MSDS) available.

Please be aware that although products manufactured by the Parflex Division are exempt from MSDS requirements, any "hazardous chemical" as defined in OSHA 29 CFR 1910.1200 transferred through the products should have an MSDS available for worker review.

We appreciate your business. Please contact me at (330) 298-2793 if you have any further questions or require further information.

Sincerely,

Josh Pigman
